

Whether at home or in company premises: energy can be saved with needs-based lighting. This is exactly what our new generation of devices, motion and presence detection, can combine in one device. The new detectors are small and have a long life. And they are quickly assembled and adjusted.

Motion and presence detectors

More capabilities, less consumption

Hager's new generation of floating and surface-mounted sensors combine motion and presence detection in one device.

Description

Movement detector 360° surface mounted

Movement detector 360° flush mounted
