Enhance your home automation with domovea by Hager

As simple as a touch, as smart as a thought, enjoy the best of home automation to manage your home.

touch & live

ease your life

Intuitive control

one interface to manage your home

domovea is the dashboard for your home, providing you with intuitive control of the different devices in your home.

Lights, shutters, heating, air conditioning or alarm system; for each room or the full floor... It's so simple to use: everything can be controlled from one single point.

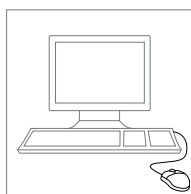

You can enjoy domovea from your home computer, laptop, smartphone, tablet or dedicated touch panel, all with the same look & feel.

touch & go

anytime, anywhere

Anytime, anywhere

stay in touch with your home

Forgot to switch the lights off? Want to switch on air conditioning when leaving the office? domovea allows you to have a remote control of your home through the internet. You can access to your system from any computer via secured internet portal and from your mobile via domovea application for iPhone, iPad and Android. With domovea, you can keep contact with your home and leave your mind at ease.

- ☒ Remote control of your home
- ☒ Get alerts on your mobile
- ☒ Monitor your home with IP cameras

touch & save

smart comfort is sustainable

For life and beyond save and spare

Manage your energy consumption with the energy dashboard available in domovea. Thanks to the data stored within domovea, you can check your energy consumption at any time against previous days, weeks, months and years and control most consuming devices.

Understand to act: you can visualise the energy consumption room by room, device by device and then optimise it to use only what is necessary.

☒ Check consumption

☒ Remote access to avoid useless energy consumption
