# Enhance your smart home

With our high-end  
home automation solution

**:hager**

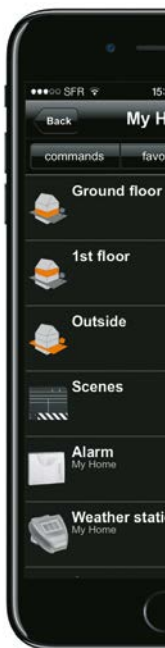

# We all want our home to reflect who we are

When it comes to smart home solutions, that means having a house customized to our personal preferences in terms of lighting, temperature control and safety.

With domovea, you can monitor and control up to 500 functions to suit your most specific needs. All with intuitive control from your smartphone, tablet or a dedicated touch panel device.

# domovea

## Manage your home from your smartphone or tablet

### Control your home anywhere, anytime

Personalise your lights, blinds, air-conditioning and heating systems. They can be managed individually or in group, by room or by floor.

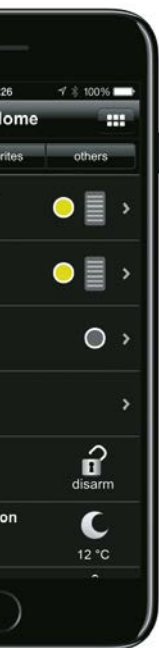

### Be sure everything is OK

Monitor what's going on at home in real-time with up to 10 cameras.

### Save on energy costs

Visualize your energy consumption by device or by room, and compare it per day, week, month or year.

Smart devices that connect with each other wirelessly: that's the Internet of Things (IoT) revolution.

With domovea, your smart home will be at the edge of this technology:

**Alexa, open the blinds!**  
The control of your smart home will be just a few words away.

## SONOS

### Music everywhere

One touch in the Sonos App: that's all it takes to turn the music on and set the right tune in your home.

## APPLE WATCH

### Your home always with you

Get notifications of your smart home in your Apple watch.

At the IFTTT website, you can also manage and control more than 200 connected objects in your smart home: [www.ifttt.com](http://www.ifttt.com)

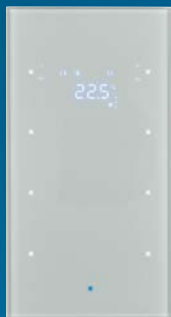

# When technology meets design

A user-friendly interface, technical perfection and timeless design are all combined into our range of Berker KNX devices. And you can also mix them for a perfect finish to your smart home.

B.IQ push-button with thermostat

KNX glass sensor

Berker R.3 switch

Berker Q.7 switch
